

The International Economy

The Japan Society of International Economics

Information and Guide for Contributors

THE INTERNATIONAL ECONOMY is the official journal of the Japan Society of International Economics (JSIE), published annually in English. It is devoted to publishing quality research in all areas of international economics; including international trade, international factor mobility, international finance, economic development, trade policy, trade institutions, etc. The journal is peer-reviewed and is open to both members and non-members of the Society. There is no deadline for the submission of manuscripts.

All manuscripts must be sent to the following office, either in an electronic form (PDF) by e-mail or in printed documents (three copies of a manuscript) by mail. Electronic documents with a CD-ROM/USB memory stick are also acceptable. Please note that JSIE assumes no responsibility for damages caused by electronic submissions through Internet. Also note that the electronic medium will not be returned to the author. Submission to THE INTERNATIONAL ECONOMY is free and there are no publishing charges for an accepted paper.

Acceptance of a manuscript should imply an automatic transfer of copyright (including the right of reproduction and public transmission) to the JSIE. All published articles will appear on the website of J-STAGE (<https://www.jstage.jst.go.jp/browse/-char/ja/>), a platform of e-journal in JST (Japan Science and Technology Corporation), as online articles of THE INTERNATIONAL ECONOMY.

Guide for Contributors

1. Manuscripts, including invited ones, must be written in English. Submission of a manuscript implies that it represents an unpublished work and that it is not under consideration for publication elsewhere.
2. Manuscripts should be double-spaced on papers of A4 size and should be no longer than 35 pages with figures and tables. All pages should be numbered consecutively.
3. The first page of a manuscript should contain the following information: Title; name(s); institutional affiliation(s); department; location; phone and fax numbers, e-mail address; abstract of not more than 100 words; key words up to five; the name of the corresponding author if there are several authors.
4. Acknowledgements can be given on the first page.
5. The body of the manuscript starts from the second page. References should be prepared at the end of the body. Appendices such as mathematical derivations or data descriptions can be given before the references.
6. Numbering sections and subsections should be followed, for example:
 1. Introduction
 2. Model
 - 2.1 Consumer
 - 2.2 Producer
 - 2.2.1 Production function
 - 2.2.2 Timing of investment
7. Mathematical formulae should be simple and concise. Authors are encouraged to use a solidus (/) instead of a horizontal line when denoting small fractional terms, e.g., X/Y , in the line of normal text. In principle, variables are to be presented in italics.
8. Some or all of the display equations may be numbered. Equations should be numbered consecutively with Arabic numerals in parentheses on the right side of the manuscript.
9. Footnotes should be numbered consecutively throughout the article, using superscript Arabic numerals.
10. Tables and figures should be prepared on separate pages. Authors should indicate the position of the figures/tables in the text.
11. References should be written in the following style:

(Book)
Grubel, H.G. and P.J. Lloyd (1975), *Intra-Industry Trade: The Theory and Measurement of Trade in Differentiated Products*, Macmillan.
Kojima, K. (1989), *Kaigaichokusetsutoshi no makurobunseki*, Bunshindo (in Japanese).

(Article)
Ohyama, M. (1972), Trade and Welfare in General Equilibrium, *Keio Economic Studies* 9 (2): 37-73.
12. Citation of references in the text should be as follows: "Ohyama (1972) studied the effects of..." or "This argument is discussed in Kojima (1989)."
